

If your child is Referred to the school's "Problem-Solving Team" you will be provided with the following information:

- Information regarding the specific interventions that are being used to address your child's individual academic concerns.
- Information regarding the techniques that are being used to monitor your child's progress and the effectiveness of the interventions we've implemented.
- Regular progress monitoring reports via AimsWeb results.
- The opportunity to meet with your child's teacher(s) to discuss the plan throughout the year.
- The opportunity to make suggestions for strategies or interventions based on what you know works well at home.
- If we need to make adjustments to your child's plan based on their response to the interventions we've tried, we will include you in that plan development as we progress through the year.

How can Parents Be Involved?

- Frequently communicate with your child's teacher(s).
- Attend school functions such as parent-teacher conferences.
- Monitor and assist with your child's homework assignments.

What If My Child is Having Difficulty With Academics or Behavior in School?

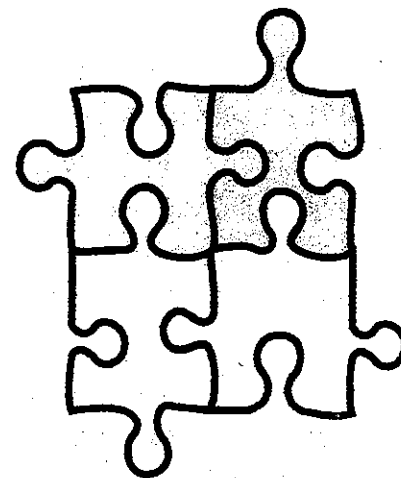

- Contact your child's individual school to get additional information on how they implement the RtI process at their level.
- Discuss with your child any concerns you and/or the teacher have regarding academics or behavior.

A Parent's Guide to

Response to Intervention

Introduction

Changes in federal and state laws have directed schools to focus more on helping all children learn by addressing problems earlier within the general education setting.

These new laws emphasize the importance of providing high quality, scientifically-based instruction and interventions, and hold schools accountable for the adequate yearly progress of all students.

This new process of providing interventions to students who are at risk for academic problems is called RtI (Response to Intervention).

What is RtI?

RtI is a process designed to help schools focus on high quality interventions that are matched to student needs and monitored on a frequent basis. The information gained from an RtI process is used by school personnel and parents to adapt instruction and to make decisions regarding the student's educational program.

What Are the Benefits of RtI?

Perhaps the greatest benefit of an RtI approach is that it eliminates a "wait to fail" situation because students get help promptly within the general education setting. As soon as assessment data indicates a problem area for a student or a group of students, interventions are put into place to address these concerns.

While the interventions are taking place, school staff monitors any progress that these students are making in their problem areas.

These progress monitoring techniques used within the RtI process provide information that allows teachers to better evaluate student needs and match instruction, resources and interventions appropriately.

What is the RtI Process?

Most RtI systems are divided into a three-tier intervention model as illustrated below:

Tier 1: -Core Curriculum - 80-90%
-Whole Group/Core Instruction
-For All Students in the Class

Tier 2: -Small Group Interventions 5-10%
-For Some Students (At-Risk)
-Done in Addition to Tier 1

Tier 3: -Intense Interventions - 1-5%
-Customized Interventions
-For a Very Small # of Students
-Done in Addition to Tier 1 & Tier 2
